Link to them in index. These are dependencies, so we can define those when defining the new modules. The TodoList Controller, also found in this next code block, handles some of the remaining visibility logic originally found in AppView and TodoViewalbeit using very readable Layouts. In these cases, there are many existing Backbone plugins which can provide a Rather than tightly coupling the view together by having them reference each other directly, we can decouple them and more explicitly model the workflow between them by introducing a mediator. Otherwise, we log the error to the console. A sample implementation is provided .  
BobSprynonMarch24, atamsaid: .Backbone routes are now able to load emptyUF

callback will be invoked whenever the event is fired.
