To date, research on these issues has been restricted to the perspective of the patient [32 - 35] without adequately addressing the perspectives of health officials who would be involved in recommending this type of intervention. Adkins distinguishes the change from the macro-sociological analysis scale, more proper to modernity, to the micro analysis of everyday life, detraditionalization and individuation Beck and Beck-Gernsheim,

Temuco: Ediciones Universidad de la Frontera. In the latter case, this would imply the self-image that nationals have of themselves, the degree of acceptance or value that they are awarded self-esteem and the ideal to which they aspire to arrive as a nation should be ; all of which would be an important part of the national identity.
