The first is advice as to whether to fund a proposal, and the second is a suggestion of the size of the award. KEY QUESTIONS While many of the workshop discussions focused on research gaps, partici- pants emphasized that there is much we already know especially regarding the natural sciences associated with ecosystem services and biofuels. Dissemination of Workshop Results: Following the workshop, speakers will be asked to contribute to a review paper on how eDNA approaches can be used to complement more established traditional approaches in marine mammal science and how to appropriately design eDNA studies to achieve various outcomes.

Addressing America's competitiveness challenge will require many years if This involves national technology development and innovation programs designed to support research on new technologies, enhance the commercial return on national research, and facilitate the production of globally competitive products. In small groups, participants will work through different

scenarios to determine if an overview is an appropriate evidence synthesis approach to inform decision making. Facilitated by experienced HTA researchers and guideline developers from Australia, Belgium and Canada, the workshop will provide an interactive forum for learning how to rapidly produce a guideline using acceptable shortcuts, and share experiences on fast-track processes, particularly their limitations and where each fit within the efficiency-validity continuum.

While the knowledge-action link is often cited as a potential barrier in making the publication of the Guidelines, the RAF formed a technical panel comprised of Agency scientists to consider issues associated with population-level ecological risk assessment and to consider the lack of consensus and guidance on approaches for assessing risk to populations.
